Our Business Continuity Plan – We plan to quickly recover and resume business operations after a significant business disruption and respond by safeguarding our employees and property, making a financial and operational assessment, protecting the firm's books and records, and allowing our customers to transact business. In short, our business continuity plan is designed to permit our firm to resume operations as quickly as possible, given the scope and severity of the significant business disruption. Our business continuity plan addresses: data backup and recovery; mission critical systems; financial and operational assessments; alternative communications with customers, employees, and regulators; alternate physical location of employees; critical supplier, contractor, bank and counter-party impact; and regulatory reporting.

In a disruption to only our firm or a building housing our firm, we will transfer our operations to a local site when needed and expect to recover and resume business within several business days. In a disruption affecting our business district, city, or region, we will transfer our operations to a site outside of the affected area, and recover and resume business as soon as possible. In either situation, we plan to continue in business, transfer operations to our clearing firm if necessary, and keep you informed of updates through our compliance group; (646) 930-6695 or compliance@olivetreeglobal.com.

Our clearing firm, Virtu Americas, backs up our important records in a geographically separate area. While every emergency situation poses unique problems based on external factors, we have been advised by our clearing firm that its objective is to restore operations and be able to complete existing transactions and accept new transactions within a reasonable period. Your orders and allocations could be delayed during this period.
